The Whareroa Blackberry Busting Group continues with their unrelenting blackberry busting work. Lynette's gloves (see photo) showing signs of something. One week in a plastic bag between blackberry busting sessions leads to spider webs and or mould (probably mould 😊). They only needed another blackberry busting session plus a glove wash to get back to normal.

Thanks to the 6 people, over 5 days at 3 hours a go for their current blackberry busting project to be crossed off the list (before going on to the next one): Richard Lambert, Alexander McManus, Lynette Francis, Sue Blaikie, Liffet Stewart and Dawn Bush

Thanks to Sue and Lynette for the photos and the info.
