Wellington Botanical Society field trip to the Ramaroa Bush

A short report about the Wellington Botanical Society field trip to the Ramaroa Bush on Saturday (July 3, 2021). It was great!

Ann reports: They were checking out plants and discovering previously unknown species in that area. Exciting to see matai and milk tree seedlings and some amazing aerial roots from *griselinia lucida* on a huge pukatea (thanks to Ann for the photos)

Matai seedling
